**SOLVERS**

**Business area:** Infrastructure

**Requirements:** Minimum 2.2 Bachelor's (BSc Hons) degree or a Master's degree in Town Planning, Geography, Economics, Politics, Environment, Law or similar

**Our teams and what they do**

### **Town Planning**

Our Town Planning team is one of the UK's leading planning consultancies, working across the UK and on overseas economic development projects. We're at the forefront of thought-leadership in planning and delivery of infrastructure and development, Net Zero, Social Value, Biodiversity Net Gain and the use of digital data to support our work.

We provide integrated solutions to the planning challenges faced by public and private sector clients at all stages of the planning cycle from policy formulation to consenting and project delivery. As a graduate, you'll enjoy variety within your role and help us to deliver outstanding projects; you could be helping to identify development opportunities, undertaking site assessments and feasibility, or preparing development frameworks to guide sustainable economic growth in the UK and overseas, you could also be supporting the preparation of planning applications for sustainable new communities, schools or major infrastructure, as well as providing economics, consultation and sustainability services to our clients. Some of our projects are key case studies in the [Digital Task Force for Planning Report 2022](#), recognised for their contribution towards a digital future for spatial and environmental planning.

Whatever your ambitions we've a role to match your passion and degree, while our training will help you achieve Chartered status and develop industry skills that are highly sought after.

**Locations for this business will include:**

Birmingham, Bristol, Glasgow, London, Manchester
