Business area: Infrastructure

Requirements: Minimum 2.2 Bachelor's (BSc Hons) degree in Building Surveying accredited with the RICS

Our teams and what they do

Building Surveying

As a Graduate Building Surveyor within Atkins Infrastructure business, you'll have the joint benefit of working in a specialist Building Surveying team and also as part of a wider multi-disciplinary environment to deliver a full suite of Building Surveying services. We offer unique and extremely varied work with a large number of high-profile public and private sector clients. This blend of work and along with our in-house property professionals will allow you develop and expand in your role and ultimately help you gain your Chartership with the RICS.

We understand the APC and have a proven track record in mentoring our candidates through their structured training programme to achieve their goal of Chartership. We provide a supportive environment to our candidates and provide Continued Professional Development that exceeds the RICS requirements. You'll gain real experience once you've completed your structured induction.

At Atkins, whether we're designing/project managing iconic buildings or maintaining property portfolios, our pride and passion is in offering intelligent and sustainable solutions. Our professional offering is with people and the environment in the forefront of our thinking. We've designed our graduate programme to provide you with unique experiences where you will play your part in all kinds of projects. Not least, we understand the emergency climate agenda and its challenges, and we're leading the response to this and playing our part – we're looking for candidates who want to do the same, there is no Planet B.

We offer a world of opportunities from the projects you'll work on to the directions you can take your career in. Whatever your ambitions we've a role to match your passion, while our training will help you achieve Chartered status and develop industry skills that are highly sought after. At Atkins you not only enrol on the APC but the Atkins graduate programme – this provides further professional development and the ability to form lasting networks and friendships with other graduates.

The Atkins Building Surveyor is recognised as being 'a cut above the rest', and we give the unique opportunity to work on a variety of projects from inception all the way through to completion seeing through the complete project life cycle interspersed with the provision of professional services ranging from condition surveys, pre-acquisition surveys, party wall work, building pathology and much more.

Key activities will begin with you supporting senior building surveyors and which forms part of our mentoring programme, and within a short time frame you'll be:

- Delivering building surveying services, such as condition surveys, party wall advice, and pre and post construction services for projects for such as refurbishments, renovations, extensions and planned works
- Providing studies and reports for our clients e.g. feasibility studies, costing advice, defect diagnosis, legal regulatory advice related to property matters
- Supporting the low carbon and Net Zero schemes

Locations for this business include:

Birmingham, Bristol, Epsom, Exeter, Glasgow, Leeds, London, Newcastle, Warrington
