

Electrical/Electronic Technical Support Engineering – Level 6

The entry requirements for the learning provider for this course are as follows:

- 96 UCAS points. We accept a full range of qualifications that carry UCAS points, including A-levels, BTECs and T levels. Please see [our guide to the UCAS Tariff](#) for examples of how to achieve these points. For most courses, we are also able to consider non-tariffable qualifications
- An applicant's Level 3 subjects must include a mathematical-based subject and a science, technology or engineering related subject; for instance, A-level Mathematics and Physics or BTEC 90-credit Diploma in Engineering.
- Applicants should have five GCSEs at grade C or above or grade 4 to 9 (or equivalent), including English, Mathematics and a science, technology or engineering-related subject. If an applicant has yet to achieve appropriate Level 2 English and Mathematics qualifications, then with their employer's support, they can complete suitable equivalents locally or with assistance from the University before commencing the apprenticeship. Please contact apprentices@bolton.ac.uk for a list of acceptable GCSE equivalents, further information and support.
- An applicant that has completed a Level 3 apprenticeship in a relevant area (for instance, as an embedded system design and development technician) may be eligible for admission.
- An applicant that has completed a foundation certificate or access to HE diploma in a relevant subject may be eligible for admission.
- An applicant with an HND/C in Engineering will be considered for direct entry to Level HE5 if they have good results in Level HE4 mathematics and science. This is subject to fulfilling the University's recognition of prior certification learning (RPCL) procedures through an interview and diagnostic test.
- Applicants will attend a joint discussion with their employer and the University of Bolton. This combined interview and onboarding discussion fosters trust and sets the tone of the relationship between the applicant, their employer and our tutors. As part of the interview, applicants may be asked to undertake additional assessment(s) or provide a portfolio of appropriate work to determine their suitability for the course.
- Admission to this programme is only available to applicants who meet ESFA eligibility criteria, including the following: 1) They are employed for a minimum of 30 hours per week in a role relevant to the apprenticeship. 2) They have the right to live and work in the UK. 3) Their employer is willing to sponsor them to spend a minimum of six hours per week of their time in off-the-job training, including attending the University (times and dates to be determined) for the duration of their course. Please note that an apprentice cannot be self-employed. ESFA eligibility criteria may change so please contact apprentices@bolton.ac.uk for up-to-date information.
- If English isn't the applicant's first language, they will also need IELTS 6.0 with no less than 5.5 in any band (or equivalent). We also accept a range of other English language qualifications – please visit our [English Language Requirements](#) web page for more details.
- To be eligible for tuition fee funding through the Apprenticeship Levy, candidates should not normally have already completed a qualification at the same level as the proposed apprenticeship, unless that qualification was gained in a completely unrelated discipline.

Where changes are made to material information contained in this course description or a decision is taken to suspend a course between the offer of admissions and enrolment, we will inform applicants at the earliest possible opportunity and will outline the various options available to the applicant.
