Our teams and what they do

Making big things happen

As a Project Management Graduate within our Aerospace, Defence, Security and Technology practice (ADS&T), you will not only be joining an exciting and forward-thinking team of highly driven Consultants, but you will also be working on some of the most interesting public and private sector projects shaping the future of the UK.

The Project Management Graduate Programme pairs learning from experience on transformative national and digital projects with a continually evolving development programme, designed to give you the tools and skills you need to become one of our industry's future leaders.

Within our business, we deploy our award-winning Project Managers and Management Consultants to work on ground-breaking projects within a wide range of clients. Examples of key clients within our Defence, Security, Government and Aviation markets include the Ministry of Defence and Heathrow Airport.

At AtkinsRéalis we offer a world of opportunities that will enable you to shape your career, with opportunities to align your skillset to the different capabilities and industries that we work in.

You'll be...

Joining our highly respected Junior Consultant Development Programme (JCDP), which will provide you with support and training to enable you to drive your career forward as a world class Project Management Consultant. During our 2-year development programme, you will develop your core consultancy skills, alongside specialist capabilities, through a mixture of client and internal projects, development, and training activities. You will also have the choice of working towards your Association for Project Management's Chartered Project Professional status or the Chartered Management Consultant Accreditation.

As a Junior Consultant, you will work both independently and as part of a team with guidance from a variety of experienced consultants and mentors. From the exciting projects you will work on to the wide variety of career paths you can pursue, we will challenge you and support your development from day one.

Our Junior Consultants will be aligned to a specific consulting capability team (Project & Programme Consultancy & Delivery), which is based on their experience and strengths, but on the programme will take on opportunities which allow them to try a variety of different role types. Outlined below is more information about the team you could join within our business:

Project & Programme Consulting & Delivery

As Project & Programme Consultants at AtkinsRéalis, we provide consultancy services to assist our clients in delivering controlled transformational change, while providing expert advisory services to support our clients continually improve in solving their most complex problems.

We have an experienced team of project delivery experts who deliver transformational change to our

clients: from setting the strategic direction of projects, to delivering the day-to-day management of change programmes, you will have the opportunity to finetune your technical project management skills throughout all stages of the project lifecycle.

We also have a team of Project Management Office (PMO) experts who use their consultancy and digital skills to support our clients to maintain standards for project management to enable better decision-making and insight using technology. From the initial design of the PMO, right through to the delivery of effective PMO leadership, AtkinsRéalis is renowned for supporting its clients to improve their PMO skills and capabilities.

As a Project & Programme Consultant you will be responsible for managing the overall planning and tracking of a project and stakeholder management to support clients to continuously improve their delivery. Day-to-day tasks may include risk management, governance, cost tracking, budget forecasting and management, planning, analytics, performance reporting and client engagement.

What are we looking for?

- Enthusiasm to drive your own career development and a motivation to learn and achieve professional accreditations in Project Management or Management Consultancy.
- Excellent communication and relationship building skills, with the confidence to work on your own initiative or as part of a multidisciplinary team.
- An ability to adapt to the changing world of work, embracing new technology and ways of working while being curious in to analyse problems and create innovative solutions.
- A drive to contribute to and grow the Early Careers community within AtkinsRéalis.
- An interest in the Defence, Security, Government and/or Aviation market
