

<p>Business area: Transportation</p>
<p>Requirements: Minimum 2.2 Bachelors/BEng degree or 2.2 Masters/MEng in Civil Engineering, Information Management, BIM or Computer Science</p>
<p>Engineering (Rail, Highways, Digital, Bridges & Civils)</p> <p>Locations: Birmingham, Cardiff, Croydon, Derby, Edinburgh, Epsom, Glasgow, Warrington.</p> <p>At Atkins, we pride ourselves on technical excellence and you will be working directly with colleagues who are industry leaders in their specialist fields. As the construction industry continues to develop and rely on information to inform data-driven decision making, the need for Information Managers becomes even greater.</p> <p>We have a clear ambition to lead the digital transformation of the built environment by harnessing information management, data, and technology. As an Information Manager at Atkins, you will help shape and drive digital delivery across our existing portfolio of projects as well as our exciting upcoming opportunities.</p> <p>Our graduate scheme will help you to develop skills in Information Management and progress towards certification with BRE in addition to further development opportunities towards chartership with institutions such as the ICE and IET. The graduate scheme provides a variety of experience including technical, management, commercial and leadership to enable a fulfilling career with Atkins.</p> <p>As a valued employee, you will join one of our Highways, Rail, Bridges and Civils or Digital teams in our Transportation division and will gain experience of all phases of infrastructure design and construction from developing initial concept designs to detailed design and onto construction & handover.</p> <p>Our teams work on a broad array of projects within the local and strategic highway & rail markets from flagship projects such as the A14 Improvement Scheme, East West Rail, as well as interesting opportunities on our many local transport frameworks where we support our clients with essential maintenance and renewal projects on their road networks. You will form part of a team tasked with transforming transport infrastructure that provides net-zero emissions, which is critical in achieving the UK's sustainable development goals.</p> <p>You will also have the opportunity to support the digital transformation of our own business by contributing to the improvement of our processes as we strive to deliver our services more efficiently and effectively.</p> <p>We work collaboratively across the country so you will work on projects across different regions with colleagues from a variety of backgrounds and cultures. As Atkins is a global company there may be opportunities for overseas working.</p>
