

Business area: Faithful+Gould - Surveying

Requirements: with/expecting a 2.2 degree or above in RICS accredited Building or Quantity Surveying degree, or a degree in any subject for those who can demonstrate commercial or technical acumen. Faithful+Gould will sponsor your MSc on a day release basis if you don't have a degree in a relevant subject

Our teams and what they do

Building Surveying:

As a building surveyor, you need to enjoy being out of the office. The nature of our projects and the work we do is hands on, you will likely be liaising directly with the client and project team as well as members of the public on a frequent basis. Time spent back in the office will not be dull, for one thing there will always be a new project to work on, our teams are growing and our project variety with it! Our building surveyors manage several projects at any one time, in a variety of different sectors ranging from a local primary school extension, to a medieval fortress, to a prison building to a recording studio – pretty much anything property related across the public and private sector. Our services include party wall, dilapidations, technical due diligence, surveys, landlord and tenant relations and compliance.

Our scope is unlimited, as is our potential. We are one of the leading providers of building surveying services within the UK, our national team will support you through your APC and beyond. If you're looking for a varied project portfolio, which frequently takes you out of the office and enjoy being part of a large, social team then this is the discipline for you

Quantity Surveying – Commercial Property:

If you join one of our Quantity Surveyor Property teams you will enjoy exposure on a wide variety of schemes, in all sectors, including new university campuses, commercial office developments, refurbishment of listed buildings and museums, large residential scheme, theme parks, the list is endless! You will learn to guide design teams, ensuring projects are designed within our clients' budget and you will work with contractors, on site, managing construction costs for our clients. Along the way you gain excellent experience to enable you to pass your APC confidently not just making you a Chartered Surveyor but making you excellent at your job.

You will be developing your communication and problem-solving skills as well as honing your mathematical ability and business acumen. You will be given the opportunity to grow, with a wide variety of projects to work on with an experienced, high performing qualified team, to learn from.

Training and development

Our training will help you solve real-life problems from day one and develop industry skills that are highly sought after.

- Our 3-year flexible graduate scheme promises to give you the support you need to develop your technical, commercial and consultancy skills. What defines Faithful+Gould is the unrivalled amount of support by your assigned supervisor and buddy during APC workshops, monthly Q&A, training and mocks.
- Professional development which will be discussed throughout GDP, supporting you in becoming a well-rounded consultant and encouraging you to obtain your APC by offering you a wide variety of work and projects in order to gain experience required to achieve this. We also offer core learning modules to develop your softer skills such as technical writing and presentation skills to enable you to complete your day to day role.

- APC coaching, professional training and industry exposure with a high-level clients and variety of projects
- This year we have had exceptional UK APC results exceeding the national average by 15% with a combined pass rate of 80% which shows our dedication and commitment to training and L&D.

What are the benefits and rewards?

If you join us you will be working on a wide range of innovative and demanding projects, helping us to turn bold ideas into reality. You will have opportunities to work closely with clients, spending time within their organisations and taking learning from some of the most experienced consultants in the industry.
