

# In the company of... SOLVERS

**Business area:** Project & Programme Services

**Requirements:** On track to achieve a 2.2 Bachelor's degree or above in Information Management, Architectural Technology or Engineering Technology disciplines.

## Our teams and what they do

### Information Management

#### Industrial year placement locations: London

Join us as an Information Management Placement Student and enjoy exposure to a wide variety of industries, clients and projects. We design with people in mind, and we've designed our placement opportunities to provide you with unique experiences as you play your part in all kinds of challenging projects. This includes adding value to our clients' data maturity journey by providing clients with strategic Information Management advice at a project or organisation level. And while you're contributing to the development of a more data-connected world, we'll support you to achieve your career aspirations.

Within the role you could:

- Support development of the Client's BIM brief and support author their Exchange Information Requirements (EIR)
- Contribute as part of the Information Management team to develop project specific information management and delivery documents including Asset Information Requirements (AIR) and Project Information Requirements (PIR)
- Assist internal project teams to review, comment and agree the BIM Execution Plan (BEP) with the Client and Consultants/Contractors
- Support the Information Management team on various projects, providing technical support and BIM expertise and guidance
- Providing assurance and compliance on project information deliverables as an Information Manager on behalf of the Client
- Review of Project and Asset Information Models
- Supporting Clients with Common Data Environment (CDE's) in the specification, procurement, configuration, onboarding, training and administering
- Keeping abreast of relevant legislative changes, industry issues and developments in best practice along with the latest national and international initiatives
- Positively contributing to and participating in internal/external training initiatives
