Our teams and what they do

Making big things happen

As a Management Consultancy Placement Student within our Aerospace, Defence, Security and Technology practice (ADS&T), you will not only be joining an exciting and forward-thinking team of highly driven consultants. During your placement, you will be working on some of the most interesting and rewarding public and private sector projects shaping the future of the UK.

The Placement Programme pairs learning from experience on transformative national and digital projects with a continually evolving development programme, designed to give you the tools and skills you need to become one of our industry's future leaders. You will be part of a talented team of consultants, enjoying all-level support from line managers to senior leaders.

Within our business, we deploy our award-winning consultants to work on ground-breaking projects within a wide range of clients, such as the Ministry of Defence, Heathrow Airport, EDF and National Highways.

At AtkinsRéalis we offer a world of opportunities that will enable you to shape your career, with opportunities to align your skillset to the different capabilities and industries that we work in.

You'll be...

Joining our highly respected Placement Consultant Development Programme that will provide you with support and training to drive your career forward. During our development programme, you will take early responsibility for assignments, whether it's consulting for public or private clients or providing key market intelligence to help grow our business. Through a mixture of client projects and internal initiatives, development and training activities, you will develop highly sought-after industry skills to take back into your final year of university.

As a Placement Consultant, you will work both independently and as part of a diverse and inclusive team, with guidance from a variety of experienced Consultants and Mentors. From the exciting projects you will work on, to the wide variety of career paths you can pursue, we will challenge and support your development from day one.

Our Placement Consultants are aligned to a specific consulting capability team (Transformation Solutions or Delivery Optimisation) based on their experience and strengths, however as part of their programme they will take on opportunities which allow them to try a variety of different role types.

Transformation Solutions

Within Transformation Solutions, we bring our clients' aspirations to life. We build long-lasting relationships and provide timely and trustworthy information. We use digital technologies and new ways of working to reduce operational costs and create leaner, more agile organisations, that can respond at pace.

Our Transformation Solutions capability encompasses a range of roles, from managing and embedding change within client organisations, to developing business cases to support strategic decision making.

As a Placement Consultant in Transformation Solutions, you will develop your stakeholder engagement, business analysis and consultancy skills, as well as honing your abilities to help our clients' journey through transformation. We'll empower you to take on responsibility quickly, whilst offering opportunities and mentors to grow your career further.

Delivery Optimisation

Within Delivery Optimisation, we make the change happen for our clients and bring certainty to delivery. We provide consultancy services to assist our clients in delivering controlled transformational change, while providing expert advisory services to optimise our client's portfolios, solve their most complex problems and ultimately achieve unparalleled results.

As a Placement Consultant, you will play a pivotal role in a diverse team driving the success of various projects across multiple industries. You will be responsible for managing the end-to-end lifecycle of projects, which includes planning, executing, and finalising projects according to managed deadlines and within budget. You will work closely with stakeholders to define project scope, goals, and deliverables, while also identifying and mitigating risks. You will also be at the forefront of using advanced technology to streamline processes and enable certainty in delivering projects or programmes. Your unique skills and attention to detail will be crucial in ensuring that projects are completed efficiently and effectively.

This role offers an excellent opportunity to develop your leadership and problem-solving skills, to grow as a professional, and to make a significant impact to the organisation's strategic objectives.

Locations for this business will include: Bristol, London and Manchester
